Beach and island tips

When exploring the beauty of Turks & Caicos, keep these helpful tips in mind for a seamless experience

1. Footwear Recommendation

Some beaches may have rocky terrain, so we recommend wearing water shoes for comfortable exploration.

2. Reef-Safe Sun Protection

To preserve our vibrant marine life, use only reef-safe sunblocks free of Oxybenzone, Octinoxate, Avobenzone, and Octocrylene. Popular brands include Coola, Stream2Sea, Sun Bum, Super Goop, and Bare Republic.

3. Payment Preferences

While enjoying local establishments, note that not all places accept AMEX. It's advisable to carry a VISA or Mastercard for wider acceptance.

4. Grocery Order Considerations

Please be aware that if certain items are missing from your grocery request, it could be due to the unavailability of the item in the local store. All items are shipped from the U.S., and delays may occur in reaching the islands.

We want your time in Turks & Caicos to be as enjoyable as possible, and these tips are crafted to enhance your experience. Embrace the beauty of our islands responsibly and make the most of your stay.

Water

Water is crucial for survival, especially in emergencies. Ensure your family's needs by storing at least one gallon of water per person for three days. Remember individual needs vary based on age, health, physical condition, activity, diet, and climate.

Preparing Your Own Containers of Water

- Use food-grade water storage containers.
- Clean with dishwashing soap, rinse thoroughly.
- Choose two-liter soft plastic drink bottles over jugs or cardboard containers.
- Sanitize with a solution of 1 tsp non-scented liquid household chlorine bleach per quart of water.

Storing Water in Plastic Soda Bottles

1. Clean bottles with dishwashing soap and water.
2. Sanitize with a chlorine bleach solution.
3. Fill with tap water; if untreated, add two drops of bleach per gallon.
4. Let stand for 30 minutes; a slight chlorine odor should be noticeable.
5. Tightly close the container, label with the filling date, and store in a cool, dark place.

Water Treatment

- Long Bay Beach Club's destination team has a micro-filter for gravity-based water purification.
- If stored water is depleted, treat suspicious water using boiling, chlorination, or distillation methods.

Boiling

- Boil for one full minute and let it cool before drinking.
- Improve the taste by pouring the water between two clean containers.

Chlorination

- Use regular household liquid bleach (5.25 to 6.0 percent sodium hypochlorite).
- Add 16 drops per gallon, stir, and let stand for 30 minutes; a slight bleach odor should be noticeable.

Distillation

- Boil for 20 minutes and collect the condensed vapor for purified water.

Water Sources

- Safe sources include melted ice cubes, liquids from canned goods, and water drained from pipes.
- Unsafe sources include radiators, hot water boilers, toilet bowl water, waterbeds, swimming pools, and spas.

Water Treatment

In case stored water is exhausted, and reliable clean sources are unavailable, treat suspicious water before use. Contaminated water can carry microorganisms causing diseases like dysentery, cholera, typhoid, and hepatitis.

Effectiveness of Water Treatment

Methods	Kills Microbes	Removes Other Contaminants Heavy metals, salts, and most other chemicals

Chlorination	Yes	Yes
